Application Rates for Plant Success Tablets

Transplanting:

Place tab at bottom of planting hole and into root ball of plant.

Existing and Container Plants:

Make holes around plant 6 inches apart and place tab in hole. Make holes approximately 3-5" deep.

Direct Sowing:

Place the tablet 1 inch from the seed beneath the soil surface.

Number of Tablets to Use Per Plant:

Use 1 tablet for seeds to 2" pots

Use 2 tablets for up to 1 gallon pots

Use 4 tablets for up to 3 gallon pots

Use 8 tablets for up to 5 gallon pots

Or use 10 tablets per inch of stem width

*Tablets must touch roots.
